29	30	31	Packaging Tips - <ul style="list-style-type: none"> • Make sure packages are able to withstand processing without the contents or packaging breaking. • Cushion items with bubble wrap, newspaper, or "foam peanuts" so they do not shift during transit. • Wrap each item separately when packing more than one item in the same box. • Remove batteries from electronic devices and wrap separately. • Close and shake the box to see if there is enough cushioning. If items are shifting, add more cushioning. • When re-using a box make sure previous labels and markings are covered before mailing.
